# A PARADIGM OF EFFICIENCY.

## The Touring caravan from ERIBA

The unique and timelessly elegant design of the ERIBA Touring is no accident. The exceptional concept featuring a steel frame located beneath an aerodynamically designed aluminium skin has its origins in the aviation industry and was perfected by an aeronautical engineer over 60 years ago.

The Touring's aerodynamic front section has numerous benefits for you on your travels, including lower air resistance and fuel consumption, as well as greater driving safety and perfect roadholding characteristics. Discover a premium quality, fuel-efficient and compact travel pro that's more than earned its cult status.

# BODYWORK AND SAFETY

- Automatic brake adjustment
- Streamlined tubular steel construction
- Anti-snake stabiliser with automatic overrun device and automatic reversing mechanism

## Soft-Close

All kitchen drawers are roller-mounted for an ultra-smooth action. They feature high-quality servo soft-touch closing mechanisms and one-hand push-locks which prevent the drawers from opening and rattling while the vehicle is in motion.

## Roof awning with LED for the ERIBA Touring

The extremely lightweight articulated awning with integrated LED light fits compactly to the curve of the roof without making the caravan any wider. The optionally available side and front sections offer additional protection from sun, wind and rain.

The optional bicycle rack accommodates two bikes securely on the drawbar, and folds back easily to allow access to the front storage area.
